

LONG WAY DOWN

words and music
R. Runyon

I've seen things that would make anybody sing
Hallalujah
I've been places where hidden voices bring
A groove right to ya
I've been to the mountain top
I've been nestled in the valley of love
And I've been silenced by the mighty presence of

I don't care that it's a long way down from here
Hallalujah
I don't care about the things that you might fear
Will happen to ya
I don't care that it's a long way down from here

I've been to the mountain top
I've been nestled in the valley of love
I can't help from bouncing
When push comes to shove
You can knock me down
But I get sucked up from above
And dropped again
I've been silenced by the mighty presence of

I don't care that it's a long way down from here
I don't care that it's a long way down from here
If you felt what I was feeling it would fill your heart with cheer

I've been to the mountain
I've heard many voices sing
Ringing from tiny places or passing on the wing
I've been stripped of everything I had to bring
Into the future

I don't care that it's a long way down from here
I don't care that it's a long way down from here
If you felt what I was feeling it would fill your heart with cheer

I've been cold where the roaring wind blows
My souls been frozen blown as white as snow
I don't care that it's a long way down from here
