

BIG ORANGE ALLIS

Big orange Allis big green John gotta get going there's work to be done

Gotta furl the fields plant some corn raise a crop just as sure as you're born

Because that's the way things are done around here

And that's the way things been done for years and years around here

We work hard but when our work is done

We kick up our heels and have a little fun

We kick up our heels and have a little fun

When things break down we pull our hair and then we get to work and start to repair

The price of parts would make a grown man cry so we improvise and here's the reason why

That's the way things are done around here

That's the way things been done for years and years around here

We work hard but when our work is done

We kick up our heels and have ourselves some fun

We kick up our heels and have a little fun

It takes a sharp mind in every way to make a living farming these days

But somebody's got to raise our food so to this tractor seat I'm glued

That's the way things are done around here

That's the way things been done for years and years around here

We work hard but when our work is done
We kick up our heels and have a little fun
We kick up our heels and have a little fun
