BIG ORANGE ALLIS

```
     G                                                C          G
1. Big orange Allis big green John gotta get going there's work to be done
2.  When things break down we pull our hair then we get to work and start to repair
3. It takes a sharp mind in every way to make a living farming these days

    G                                                  C       G
Gotta furl the fields plant some corn raise a crop just as sure as you're born
The price of parts will make a grown man cry so we improvise and here's the reason why
But somebody's got to raise our food so to this tractor seat I'm glued

      C                                          G
C  Because that's the way things are done around here
H      C                                      F       C            G
O  And that's the way things been done for years and years around here
R      F                          C
U  We work hard but when our work is done
S        F                       C          G
    We kick up our heals and have a little fun
         F                       C          G
    We kick up our heals and have a little fun
```
